Hi Nick,

With regards the contaminated land condition, no.7:

Within 3 months of the date of this permission, a land contamination report, with recommendations for further works of potential land contamination (if required) shall be submitted to and approved in writing by the Local Planning Authority. Details to be submitted shall include the findings of shallow soil samples taken from the garden area which have been analyzed for a broad range of contaminants.

I can advise that the submitted report, Demeter Environmental, April 2015 is sufficient. As such I can advise that the condition has been satisfied and should be discharged.

Regards,

Sally
